

Fibra product line

## Keypad TouchScreen Fibra

Wired keypad with touch screen and contactless authentication.

Keypad TouchScreen Fibra is a device of the wired Fibra product line. Only accredited Ajax Systems partners can sell, install, and administer Fibra products.

### Intelligent security and automation management

Keypad TouchScreen is developed for easy-to-view security and convenient control. With the graphical interface and sound notifications, all the users' commands and the system's responses are perfectly expressed. The keypad clearly shows if a command is accepted. For example, it shows the cause of the malfunction during the integrity check. The users are always aware of the system status and what actions should be taken.

### Key features

- Easy security groups management
- Control tab for automation devices
- Sound notification for alarms, door opening (Chime), delays, and other events
- Keypad activation when user approaches the device
- Automatic backlight brightness control
- On-screen notification with the cause of the malfunction when arming

### Three fast and secure authentication methods

Pass card or Tag key fob

Code

Smartphone

## All set in case of emergency

- Keypad locking when someone tries to guess the code
- Duress code
- Protection against authentication via unauthorized access devices
- Three panic buttons: alarm, fire, and auxiliary

## Fibra communication technology

- Up to 2,000 m of wired communication between the keypad and the hub
- Data is encrypted throughout the transmission process
- Regular polling to display current device status
- Devices of different types can be connected to a line

## Easy setup and configuration

- Installation on the SmartBracket mounting panel without disassembling the enclosure
- Pairing with the hub via QR code or automatic line scanning
- Remote control and configuration in the apps

## Complex sabotage protection

- Tamper alarm
- Protection from short circuit on the Fibra line
- Device authentication to prevent spoofing

Superior, Fibra, and Baseline product lines are mutually compatible. This opens up numerous possibilities for building systems of any configuration.
